### Setting up IMAP on your iPhone

To set up iPhone for IMAP, do the following:

1. Tap **Settings**.
2. Tap **Mail, Contacts, Calendars**.
3. Tap **Add Account**.
4. Tap **Other**.
5. Tap **Add Mail Account**.

Enter the following information in the spaces provided:

1. Name—Enter your first and last name. This is the name that will appear in the **From** field of messages you send.
2. Address—Enter your entire email address (e.g., myname@mydomain.com).
3. Password—Enter the password for your email account.
4. Description—Enter a descriptive name for the account (e.g., Work Account). This description will be visible only to you.

Tap the **Save** button.

If **IMAP** is not already selected, tap the **IMAP** button.

Under both the **Incoming Mail Server** and **Outgoing Mail Server** sections, enter the following information:

1. **Host Name**—Enter the secure server name:  
secure.emailsrvr.com
2. **User Name**—Enter your entire email address (e.g., myname@mydomain.com).
3. **Password**—Enter the password for your email account.
